

# Scottish Engineering Special Leaders Award for STEM

*If you could be an engineer in Scotland – what would you do?*

*We challenge Primary and Secondary school pupils in Scotland to research and interview inspiring engineers!*

## The Challenge

Pupils are asked to research engineering and interview a practicing engineer to interpret the statement *"If I could be an engineer in Scotland – what would I do?"*.

**Primary pupils** are asked to illustrate their response, accompanied by **100 words**.

**Secondary pupils** are asked to illustrate their response, accompanied by **350 words**.

This award is a great opportunity to engage pupils with real engineers who will convey the importance of STEM in their daily working lives. Schools will be able to develop relationships with industry, both local and worldwide, giving pupils a unique perspective of professions and their significance in the wider world.

Our website contains resources which can help pupils get their research underway! You can find them [here](#).

*Closing date is 20<sup>th</sup> November 2013.*

# How to get involved

## Teachers

Register your school via the website. Once registered, you will receive an application pack and further guidance on completing the award.

All successful participants will receive a certificate. Winning entries will be exhibited to the public – details to be confirmed.

For more information, [visit our website](#).

## Engineers

If you wish to inspire the next generation with your engineering experiences and enthusiasm, please contact us at [editor@leadersaward.com](mailto:editor@leadersaward.com), and we will be in touch with further information.

Download our calendar for 2013 featuring winning entries from 2012!
