Steeple Grange Light Railway

Wirksworth's First Heritage Railway

Derby and Nottingham Area Committee

VISIT

STEEPLE GRANGE LIGHT RAILWAY

Institution of MECHANICAL ENGINEERS

We have arranged a visit to the Steeple Grange Light Railway which includes a tour of the engine house and rolling stock, and rides along the narrow-gauge railway. Members and guests are welcome to join us for an enjoyable and interesting visit. The tour of the engine house will begin at 11:30.

About the railway:
The Steeple Grange Light Railway is a volunteer-operated 18-inch gauge line near Wirksworth in Derbyshire. It is built on the trackbed of the Killer's Branch of the old Cromford and High Peak Railway, now the High Peak Trail. Motive power is provided by ex-industrial diesel, petrol, and battery-electric locomotives, and passengers are carried in old manriders once used to convey miners below ground. The Railway has rides along the main line to Middleton, passing through dramatic limestone cuttings, together with a shorter trip along the branch line into Steeplehouse Quarry. On operating days, volunteers are on hand to answer questions about the local railways and show visitors the fossils to be found in the area.

Sunday 31st July 2022

11:00-15:00 (Tour starts at 11:30)

Steeple Grange Light Railway,
The Engine House, Old Porter Lane,
Wirksworth, Matlock DE4 4GE
