

## Technical Visit to International Commerce Centre (ICC)

The International Commerce Centre (ICC) is a 118 floor, 484 m (1,588 ft) skyscraper completed in 2010 in West Kowloon, Hong Kong, making it the tallest building in Hong Kong.

This visit will focus on the building services provision of the building including Genset Installation, Water Pump Installation and Water Pump Installation.

This visit has focused on the facilities inside ICC.

On December 15, 2012, the IMechE HK Branch organized a technical visit to ICC. The technical visit provide a good opportunity to our members and engineers to understand more about the facilities inside ICC. During the visit, the staff of ICC introduced fully in the area of Emergency Generator System, E&M Provision on Refugee Floor, engineering provision in Chiller Plant Room, all were state-of-the-art.

To the success of this visit, we would like to thank Mr Jeff Ng of ICC and his colleagues for his outstanding presentation and tour guide for the whole visit.
