

Technical Visit to KMB Lai Chi Kok Depot

The KMB Lai Chi Kok Depot is a new environmental-friendly Bus Depot, with a total floor area of 43,784 square meters, comprises two parts, a 3-storey bus depot for repair, maintenance and parking of buses, and a 6-storey administration building providing logistic and support services.

The depot aims to provide maintenance for some 1,000 buses in the West Kowloon and South-West New Territories regions. It supports the operations of over 110 bus routes covering these regions, as well as a large number of cross-harbor tunnel routes.

This visit has focused on the facilities inside the KMB Lai Chi Kok Depot

On January 19, 2013, the IMechE HK Branch organized a technical visit to KMB Lai Chi Kok Depot. The technical visit provides a good opportunity to our members and engineers to understand more about the facilities inside the Depot. During the visit, the staff of the Depot introduced fully in the area of bus automatic cleaning system, bus automatic fuel refilling system, all facilities installed inside the bus, all were state-of-the-art.

To the success of this visit, we would like to thank Ir Mui and his colleagues for his outstanding presentation and tour guide for the whole visit.
