

	BIOGRAPHICAL INFORMATION	POLICY STATEMENT
	<p>From London, Engineering degree at Cambridge University. Since the age of 16 worked each summer on industrial placements in London, Israel, Germany, and then Italy, where I've lived since 1985.</p> <p>I've worked in Italy, France & the UK on international projects covering most continents, in the sectors of Manufacturing Engineering and IT as a specialist and later as Project Manage. Skilled in being open and a good listener to diverse attitudes and opinions, to then bring a consensus, conclusions, and action plans. Currently I'm a Project Manager for an Aerospace assembly shop Industry 4.0 Innovation project.</p>	<p>As a British-Italian nationality European, I share the difficulties of British and Europeans with today's changing and troubled world. I want to give back to the profession and to the younger Engineers, some of what I've been able to enjoy, in the form of time, dedicated to reshaping the Institution and its governance, as I've done for the past 12 years.</p> <p>Coordination and networking across the continent, traversing interest groups, Institutions and academia is a key to assisting and encouraging the profession.</p>
