

Discovering Remap Glos

***Wednesday 11th July 2018 at 7.30 pm
at EDF Energy Lecture Theatre, Barnwood, Gloucester***

**POSTPONED DUE
TO CLASH WITH WORLD
CUP MATCH**

The photo shows a young lady with a very short right arm on her Remap Glos modified bicycle. She wanted to ride with her school friends so we made an adaptation for her right handlebar as shown which she could reach and we also modified the braking system so that both front and rear brakes could be applied with her left hand. A cable adjuster was incorporated to balance front and rear brake effect safely. She was last seen happily riding with her friends around hilly Stroud.

For information about Remap please see the Remap Gloucestershire web-site:
<https://www.remapglos.org.uk>

John Fox, Chairman of Remap Glos with 25 years of experience in Remap, will give the talk.

Booking: <http://nearyou.imeche.org/near-you/UK/Western/Gloucester-Area/event-detail?id=14656>
Time: Refreshments from 7:00pm, Lecture at 7:30pm
