ENGINEERING THE ALL-NEW RANGE ROVER

Speaker: Nick Miller

Vehicle Programme Chief, Jaguar Land Rover

With the New Range Rover now on the market, Nick Miller will introduce the new vehicle to the audience, covering the design and engineering technologies of the new vehicle.

With a suite of efficient mild-hybrid and plug-in hybrid powertrains – and a pure-electric Range Rover set to join the line-up in 2024 – this car demonstrates a variety of pioneering powertrain technologies.

Attend the lecture to get an insight into the engineering behind the new vehicle architecture, it's technologies and features. These include All-Wheel Steering and Electronic Roll Control System as well as the creation of a new 7 seat derivative. Come to hear directly from Jaguar Land Rover about how their New Range Rover is the start of the next era for this British Icon.
