

# Introducing Marine Energy In North Wales

## What is it about?

Join us for an introduction to the current and future opportunities for the marine energy sector in North Wales. Local tidal and offshore wind energy device developers - Minesto, Nova Innovation and RWE - along with Marine Energy Wales will present on current and future projects they are developing in North Wales and what this means for you. They will then be joined by Morlais, Holyhead Port Authority and the Offshore Renewable Energy Catapult's Marine Energy Engineering Centre of Excellence to form a panel hosted by the IMechE and discuss questions submitted by the audience.

## Information

**Date:** 14th September 2021

**Time:** 5:30—7pm

**Location:** Virtual

## Bring your questions!

Click **here** to register your place at the event.

We look forward to seeing you there!
