

**NEW VEHICLE INTRODUCTION:
THE CROSS-INDUSTRY CHALLENGE**

David Galloway

Professional Head of System Compatibility, Network Rail

14 November 2019 – The Quadrant (MK9 1EN) Milton Keynes, F-101

Arrivals and refreshments from 17:00

Talk starts at **17:30** and ends around **19:00**

Description

The introduction of new railway vehicles in the United Kingdom presents a unique engineering challenge to those involved, as often we are introducing a vehicle equipped with 21st century technology on to an infrastructure which, in places, is largely the same as the Victorian era and which varies greatly across regions. David will be covering some of the challenges currently being faced by the industry for new Rail Vehicle Introductions, and Network Rail's main responsibilities as an Infrastructure Manager and a Affected Party for new vehicle introductions.

Speaker

David started his railway career in track maintenance 19 years ago before moving into gauging. He is now Professional Head of System Compatibility for Network Rail and is accountable for the Vehicle Introduction, Interoperability, CSM-RA, Product Acceptance and Design for Reliability Frameworks.

The Event is FREE and open to all!

Light refreshments will be provided prior to meetings. Please book, if you can, to assist catering numbers using either the QR code or the link below. If you cannot book feel free to attend regardless.
