Improving the world through engineering

The Real Iron-Man!

We've all dreamed of flying -- but for Richard Browning, flight is an obsession. He's built an Iron Man-like suit that leans on an elegant collaboration of mind, body and technology, bringing science fiction dreams a little closer to reality. Learn more about the trial and error process behind his invention.

Richard Browning is the founder of human propulsion technology startup Gravity, which has invented, built and patented a personal flight system.

Wed 5th Dec 2018 19:00

Doors open **6.30pm** with Coffee/Tea available

Canapé Reception will follow the lecture
