BRIDGNORTH
ALUMINIUM LIMITED

Description

The visit will give an overview of Aluminium hot rolling process and some of the challenges of the engineering working. You will be able to see and appreciate Bridgnorth Aluminium ltd state of the art lab.

About the recipient

Bridgnorth Aluminium Ltd now produces more than 100, 000 tonnes per annum! It is the BIGGEST rolling plant in the United Kingdom with state of the art equipment and high demand.

Having manufactured aluminium strip since 1933, Bridgnorth Aluminium Ltd has firmly established itself as a trusted global supplier of rolled aluminium products. Our knowledge and experience spans many decades, evident in the work we do today.
