James Webb Space Telescope: Seeing the past

Supported by Anglia Ruskin University and Jonathan Lee Recruitment

Speaker:

Alistair Glasse, Royal Observatory, Edinburgh
Alistair Glasse is the Mid-Infrared Instrument (MIRI) instrument scientist. He has worked as a project scientist for the Michelle Instrument at United Kingdom Infrared Telescope on Mauna Kea, Hawaii, and as a research assistant in the Infrared Space Observatory team at European Space Agency (ESA)/ European Space Research and Technology Centre (ESTEC) in Noordwijk, the Netherlands. He has been building infrared instrumentation for astronomy for the past 30 years and will describe the commissioning and operation of the James Webb Space Telescope discussing the infrared instrument in particular.
