HS2: A System Engineering Challenge

Speakers:
Iain Smith, Director of Rolling Stock & Depots and Thomas Williamson, Head of Rolling Stock Engineering, HS2 Ltd

An overview will be given of the programme and why, operational and technical challenges to deliver the journey times and the challenges of operating on the high speed and conventional networks. They will also discuss minimising the impact on the environment relating to the Rolling Stock noise and aerodynamics

29th November 2017
