LECTURE BY
Anthea Dolman-Gair
Senior Programme
Manager, Network Rail

Monday 13 February 2017

18:00 – 19:15

**Cardiff University School of Engineering
Trevithick Lecture Theatre (Room T2.09),
Second Floor, Trevithick Building,
The Parade, Cardiff, CF24 3AA**

The objectives of this event are:

- Raise the profile of the railway industry amongst young mechanical and electrical engineers;
- Build links between railway engineering employers, Universities, and the engineering institutions;
- Demonstrate that railway engineering is a growth industry that can provide excellent long-term prospects for varied and satisfying careers, noting as an example the £multi-billions being invested in Crossrail, electrification, new trains, maintenance depots and other enhancements for the Great Western mainline.
- Provide an interesting and topical insight into the scale and variety of the engineering challenges the rail industry offers through a prestige lecture

CAREER OPPORTUNITIES

Discuss careers in the fast-growing world of railway engineering with a range of railway engineering employers over tea and coffee from 17:00, and with free pizzas, beers and other drinks after the lecture between 19.15 to 20.30.

Improving the world through engineering
