Does Decarbonisation Mean Deindustrialisation?

What is the future of green employment in the South Yorkshire region?

Join us at The Diamond
The University of Sheffield
Starting with a light buffet from 6pm

A Joint Professional Engineering Institutions Event

Net Zero is a huge committment, and how we achieve it will dramatically affect our way of life, but what does it mean for the local region?

- How far can we reduce emissions locally?
- How do we avoid emissions reduction here leading to larger CO_2 footprints globally?
- How is our industrial and academic base working to solve the problems?
- How do we balance Carbon, Cost, Capability, Culpability and Community?

Our Chair will be Richard Caborn, a lifelong supporter of Sheffield and the importance of engineering in the wider economy. In addition to his career in front bench politics, Richard has experience in engineering, industrial policy and the low carbon sector.

Our Panel

Ed Heath-Whyte
Head of Environment and Sustainability
Liberty Steel Group

Prof Lenny Koh
Director CEES & AREC
The University of Sheffield

Chris McDonald
C.E.O.
The Materials Processing Institute

Richard Sulley
Net Zero Project Director.
South Yorkshire Mayoral Combined Authority
