THE ROLE OF HYDROGEN IN MEETING NET ZERO GOALS

Institution of MECHANICAL ENGINEERS

With multiple areas of application - transport, heating, decentralised power - hydrogen is a key piece of the puzzle in meeting net zero targets. Adoption of H_2 is dependent upon developing the infrastructure and supply chain to support the eventual use cases. This lecture will examine opportunities and challenges in deploying H_2, and a glimpse of how Bosch is leading development of technologies across the H2 Ecosystem.

Thursday April 25th 2024

Chichester Lecture Theatre, University of Sussex, Falmer, Brighton, BN1 9QJ
At 18:30. Refreshments will be provided.
