SHOREHAM POWER STATION VISIT

An opportunity to tour Shoreham power station and to learn about the site's 22-year history, operations and the recent major Gas Turbine inspection and deployment of the 'High Efficiency' (HE) Upgrade package. Shoreham is only the third site globally to deploy the HE Upgrade on the legacy Alstom GT26 Gas Turbine. This upgrade increases Shoreham's efficiency significantly, increases the site's capacity, and reduces the Carbon intensity of its generation output

Hosting will be Station Manager, **Gordon Walker, MEng MBA CEng FIMechE**

Institution of MECHANICAL ENGINEERS

Thursday 21st July 2022,
6.30pm for a 7.00pm start.

Shoreham Power Station,
Basin Road South, Portslade, BN41 1WF
