LASER PROCESSING IN MANUFACTURING & FUTURE TRENDS

Bethan Smith
Head of Laser Processing
MTC Laser Processing Centre of Excellence

Bethan Smith has led the Laser Processing team at the MTC for 7 years delivering large research projects as well as industrial projects in additive manufacturing and laser based technologies for aerospace, defence, etc.

She sits on the Association of Industrial Laser Users (AILU) board and is the deputy chair for the HVMC cross-catapult special purpose group in Joining Technologies.

She's also a Chartered Engineer and a member of IMechE's Manufacturing Industries Division board.
