

Automobile Division Yorkshire Centre

ALVIS RACING CARS

Tony Cox MBE

The talk will trace the engineering story behind the many ground-breaking features of the Alvis FWD racing cars of 1925-1930, and describe the ongoing restoration of the 1927 Grand Prix Alvis, involving the application of digital technology to reverse engineer and recreate a number of missing major components.

An Alvis FWD rolling chassis and other components will be available to view at the lecture.

Tuesday 22nd May 2018

7:00pm. Refreshments from 6.30pm

The Barn lecture theatre, Horton Building (8)
University of Bradford, BD7 1AZ
