TRANSFORMING PLM: Next Gen Product Development Automation with AI from Cars to Coasters

Krishna Baride,
IT Solution Sr Leader - Enterprise PLM, Cummins

Institution of MECHANICAL ENGINEERS

This insightful talk will discuss industry trends in PLM and how transitioning to digital PLM creates a unified environment for product development, enhancing efficiency and collaboration. Also discover AI's role in PLM through predictive analytics, intelligent automation, and improved decision-making. Understand how GenAI automates complex design tasks, fostering innovation and rapid prototyping in this evolving PLM landscape.

What is Product Lifecycle Management (PLM) and what is its role in the industry across Discrete Manufacturing, Retail, Telecom and Amusement parks.

Attendees will gain valuable insights into the successes of the program and the future of PLM. You would hear first hand case study of this transformation involving a multi-phased strategy, from assessment to implementation.

Tuesday 29th April 2025

6:30pm to 8:00pm.

Venue:
Online Event (MS Teams)

Please Register

Free to attend with family and non-members all welcome to join.

This event contributes to CPD.
