

The Park for the awareness of the general public on Renewable Energy Sources (RES) is developed by CRES in located Keratea near Athens.

"The Centre for Renewable Energy Sources and Saving (CRES) is the Greek national entity for the promotion of renewable energy sources, rational use of energy and energy conservation.

In the modern demanding energy sector CRES is dynamically active, in the frame of the national and Community policy and legislation, for the protection of the environment and sustainable development.

Working in the state of the art of technology development, CRES implements innovative projects and significant activities for the promotion and market penetration of new energy technologies."(www.cres.gr/kape/index_eng.htm)

Our thanks to our hosts Mr Minas Iatridis (AMIMechE) Head of the Energy Policy Analysis Department, Ms Eftihia Tzen (AMiMechE) responsible for PENA and Dr Kyriakos Rossis both of the Wind Energy Department as well as the students of NTUA Mechanical/Electrical Engineering Department Mr George Pouloupoulos and Mr George Xenarios, who provided the technical information and guided us through the projects in the park.
