

**Farnborough and Guildford IMechE Area  
presents:**

# **BOILERS DO EXPLODE!**

**LECTURE AND LIVE DISPLAY**

**Institution of  
MECHANICAL  
ENGINEERS**

At the beginning of the last century steam tractors were a common sight on the land. Peter Stearne is one of a dedicated band of enthusiasts who not only run steam engines but actually build them in the traditional manner! So the problem of boilers blowing up is very real. The engines on display are not models however, but are scaled down versions of commercial machines. Peter will bring a couple of traction engines along, one of which will be "in steam" and will be demonstrated at 6.00pm at the BOSC sports club next to the School of Electrical and Mechanical Engineering at Bordon. A lecture focussed on the engineering problems which sometimes arise will start at 19:30. Feel free to bring guests or family. The bar will be open all evening!

**June 8<sup>th</sup>, 18:00 for a 19:30  
start.**

Bordon camp, Bordon, GU35 0HJ. Turn into the camp, then follow signs for BOSC road and the sports club.
